

Mr&Mrs FRAGRANCE	MATERIAL SAFETY DATA SHEET		CESARE
	VANILLA		
Current revision date: 23/01/2023	Current revision number: 03	Previous revision date: 28/12/2020	Previous revision number: 02

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

Commercial name : VANILLA  
 UFI : KX20-50C7-H002-5G53  
 European product categorisation system (EuPCS): PC-AIR-4 - Air care products for vehicles

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Uses	CONSUMER	PROFESSIONAL	INDUSTRIAL
		EVA air freshener for small rooms	

Uses advises against : All those not expressly identified on the label  
 Life cycle stages : C-Consumer use

### 1.3 Details of the supplier of the safety data sheet

Joy Fragrances s.r.l.  
 Via Gavinana, 14 - 21052 BUSTO ARSIZIO (VA) - Italy  
 tel. +39 0331 536942 - [www.mrandmrsfragrance.com](http://www.mrandmrsfragrance.com)  
 email competent person [info@joyfragrances.it](mailto:info@joyfragrances.it)

### 1.4 Emergency telephone number

Joy Fragrances s.r.l. - Tel +39 +39 0331 536942 - from 09,30 to 12,30 - from 15,30 to 19,30

## SECTION 2: Hazards identification

### 2.1 Classification of the substance or mixture

#### 2.1.1 Classification in accordance with Regulation (EC) No 1272/2008:

The product is classified as dangerous pursuant to the provisions of Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and adjustments), the product therefore requires a safety data sheet compliant with the provisions of Regulation (EU) 2020/878.

Hazard pictogram(s) : None  
 Hazard Class and Notes Category Code(s) : Aquatic Chronic 3  
 Hazard statement Code(s) : H412 - Harmful to aquatic life with long lasting effects

#### 2.1.2 Adverse Effects

The product is dangerous for the environment as it is harmful to aquatic organisms with long lasting effects

### 2.2 Label elements

#### 2.2.1 Label in accordance with Regulation (EC) No 1272/2008

Hazard pictogram(s) : None

Signal Word Code(s) : No signal word is used  
 Hazard statement Code(s) : H412 - Harmful to aquatic life with long lasting effects  
 Suppl. Hazard statement Code(s) : EUH208 - Contains (Dihydro pentamethylindanone, Helional, Tetramethyl acetyloctahydronaphthalenes, Acetyl Diisoamylene, 4-tert-butylcyclohexyl acetate, Isoeugenol). May produce an allergic reaction

#### Precautionary statements

##### General

P101 - If medical advice is needed, have product container or label at hand.  
 P102 - Keep out of reach of children.

##### Prevention

P273 - Avoid release to the environment.

##### Disposal

P501 - Dispose of contents/container in accordance with local/ national regulation.

#### 2.2.2 Additional regulations to be implemented on the label

Regulation (EC) 648/2004 : Not applicable  
 Regulation (EU) 528/2012 : Not applicable

**Additional information:** Not a toy. Do not swallow. Do not leave the product exposed in environments with temperatures above 70°C. Do not use the product for purposes other than those intended. Only insert into the air vents. Avoid contact with shiny or metallic surfaces.

### 2.3 Other hazards

The mixture does NOT contain PBT / vPvB substances according to Regulation (EC) 1907/2006, annex XIII in concentrations equal to or greater than 0.1% by weight. The mixture does NOT contain substances that have been included in the list established in accordance with Article 59, paragraph 1 due to properties of interference with the endocrine system in concentrations equal to or greater than 0.1% by weight.

The mixture does NOT contain a substance identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations equal to or greater than 0.1% by weight.

ISO 8317\_ Child-resistant packaging - Requirements and testing procedures for reclosable packages Not applicable  
 EN 862\_ Child-resistant packaging - Requirements and testing procedures for non-reclosable packages for non-pharmaceutical products Not applicable  
 Tactile warnings of danger (ISO 11683\_Packaging - Tactile warnings of danger - Requirements) Not applicable

## SECTION 3: Composition/information on ingredients

### 3.1 Substances

Not relevant

### 3.2 Mixtures

Refer to section 16 for the full text of the hazard statements.

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

First aid instructions categorized according to relevant routes of exposure. It is advisable for those who provide first aid to wear the personal protective equipment deemed suitable for the conditions in which the intervention is to be carried out.

#### Inhalation

Given the specificity of the product and the small quantities of substances released, conditions such as to require first aid measures are not foreseen.

#### Skin

Wash the areas of the body that have come into contact with the product with plenty of soap and water, even if they are only suspected.

#### Eyes

Given the particular structure of the product, accidental contacts are unpredictable and mainly of traumatic and/or voluntary origin. If necessary, apply fresh compresses and, if the painful phenomena continue, contact the medical staff.

#### Ingestion

SEEK MEDICAL ATTENTION IMMEDIATELY.

### 4.2 Most important symptoms and effects, both acute and delayed

#### Inhalation

They are not known and there are no specific reports on symptoms and effects caused by the product.

#### Skin

They are not known and there are no specific reports on symptoms and effects caused by the product.

#### Eyes

Redness.

#### Ingestion

They are not known and there are no specific reports on symptoms and effects caused by the product.

### 4.3 Indication of any immediate medical attention and special treatment needed

See section 4.1 Description of first aid measures.

Current revision date: 23/01/2023

Current revision number: 03

Previous revision date: 28/12/2020

Previous revision number: 02

**SECTION 5: Firefighting measures****5.1 Extinguishing media****Suitable extinguishing media** : Water spray, CO<sub>2</sub>, alcohol resistant foam, chemical powders depending on the materials involved in the fire.**Unsuitable extinguishing media** : None in particular**5.2 Special hazards arising from the substance or mixture**

During combustion, fumes that are potentially harmful to health may develop. If exposed to flame, it catches fire and continues to burn with a dimly lit flame even if removed from the heat source.

**5.3 Advice for firefighters**

Use protective clothing for the respiratory tract, eyes and skin. Water spray can be used to disperse vapors and protect people engaged in firefighting. It is also advisable to use self-contained breathing apparatus, especially if you work in closed and poorly ventilated places. Wear the specific protective equipment of the firefighting team. Given the polymeric characteristic of the material, the possible presence of considerable quantities of product in the environments involved in the fire can be a source of risk in causing the re-ignition of the fire in the presence of oxygen since the internal layers can conserve heat. It is therefore necessary, in the event of a fire in environments where large quantities of product have been involved, to dissipate the heat retained inside.

**SECTION 6: Accidental release measures****6.1 Personal precautions, protective equipment and emergency procedures****For non-emergency personnel** : Move away from the area surrounding the spill or release. Not smoking.**For emergency responders** : General information: No smoking. Use suitable personal protective equipment, see Section 8.**6.2 Environmental precautions**

Contain leaks with inert material. Avoid dispersion and/or washout in sewers and surface waters. Dispose of the residue according to current regulations.

**6.3 Methods and material for containment and cleaning up****6.3.1 Appropriate advice shall be provided on how to contain a spill**

Keep dry.

**6.3.2 Appropriate advice shall be provided on how to clean-up a spill**

After collection, wash the affected area and materials with plenty of water and recover the resulting fluids.

**6.3.3 Any other information shall be provided relating to spills and releases, including advice on inappropriate containment or clean-up techniques**

Hand over waste only to specialized companies

**6.4 Reference to other sections**

Refer to sections 8 and 13 for more information

**SECTION 7: Handling and storage****7.1 Precautions for safe handling**

Normal precautions for handling sensitizing chemical products, protecting themselves from any accidental contact. Do not smoke, eat or drink while handling.

**7.2 Conditions for safe storage, including any incompatibilities**

How to manage risks associated with:

i) explosive atmospheres	Nothing to report
ii) corrosive conditions	Nothing to report
iii) flammability hazards	Nothing to report
iv) incompatible substances or mixtures	Avoid contact with solvents which could damage the product.
v) evaporative conditions	Keep in the original packaging, in well-ventilated areas at room temperature.
vi) potential ignition sources (including electrical equipment)	Keep away from open flames, sparks and sources of ignition in general. Appropriate maintenance of all the electrical components of machines, systems and electrical installations in general can give a sufficient guarantee of reducing the risk of fire.

How to control the effects of:

i) weather conditions	Store indoors in dry environments.
ii) ambient pressure	Nothing to report
iii) Temperature	Store at room temperature
iv) sunlight	Do not store in direct sunlight.
v) humidity	Keep away from humidity.
vi) Vibration	Nothing to report

How to maintain the integrity of the substance or mixture by the use of:

i) stabilisers	Nothing to report
ii) antioxidants	Nothing to report

Other advice including

i) ventilation requirements	Keep in cool and ventilated places.
ii) specific designs for storage rooms or vessels (including retention walls and ventilation)	Nothing to report
iii) quantity limits under storage conditions (if relevant)	Keep in cool and ventilated places.
iv) packaging compatibilities	Nothing to report
v) Storage class	Not applicable

**7.3 Specific end use(s)**

Consumer: Follow the instructions given on the label/box/information leaflets.

**SECTION 8: Exposure controls/personal protection****8.1 Control parameters**

## 8.2 Exposure controls

### 8.2.1 Appropriate engineering controls

If, following the risk assessment and the adoption of preventive technical and/or organizational collective protection measures, it appears that there is still a residual risk for the worker, it is necessary to equip the worker with Personal Protective Equipment. In any company, however, the instructions given by the Head of the Prevention and Protection Service must be complied with, who will have assessed the risk deriving from all the products used in each working phase. Before choosing the PPE to wear, it is essential to know the risks associated with the work environment, the environmental conditions, the job of the wearer and after having consulted the instructions provided by the manufacturer. All PPE belonging to the third category must be delivered to operators only after adequate training.

The use of this mixture does not imply the application of Directive 2004/37 / EC on the protection of workers against the risks deriving from exposure to carcinogens or mutagens at work.

**Descriptor for Process categories:** PROC19 - Manual activities involving hand contact

### 8.2.2 Individual protection measures, such as personal protective equipment

The information below must be considered only as an aid to the Head of the Prevention and Protection Service as in addition to this mixture he will have to implement the choices on PPE also in consideration of the other chemical products present in the company used in each specific working phase.

#### a) EYE/FACE PROTECTION

PITTOGRAM	PPE	METHOD OF CHOOSING THE PPE					
		RISK CHARACTERISTICS	PROTECTION				
 Eye and face protection devices	PPE for the eyes are second category and must be provided with indelible CE marking and the number of the Notified Body that issued the certification. Their use is foreseen in all places where there is a risk of projections of solid bodies, liquids or optical radiation. For eyeglass wearers, it is possible to use over glasses if the duration of use is limited or to mount graduated lenses on safety frames. Operators wearing contact lenses must make their condition known in order to make it easier, if necessary, to remove them by first aid workers in case of need in an emergency. Standard EN166 Personal eye protection - Specifications	Frontal sketches	Good	Glasses with side shields	Excellent	Face shield	Excellent
		Side sketches	Scarso	Good	Excellent	Good / Excellent	
		Frontal splinters	Excellent	Good	Excellent	Excellent if of adequate thickness	
		Side impacts	Scant	Fairly good	Excellent	It depends on the length	
		Neck and face protection	Scant	Scant	Scant	Fairly good	
		Wearability	Good / Very good	Good	Fairly good	Good (for short periods)	
		Continuous use	Very good	Very good	Fairly good	Fairly good	
		Acceptability for use	Very good	Good	Scant	Fairly good	

The Head of the Prevention and Protection Service will assess the need to provide eyewash devices near the areas where the mixture is used.

### IN NORMAL USE THERE ARE NO PERSONAL PROTECTIVE EQUIPMENT PROVIDED

#### b) SKIN PROTECTION

##### i) Hand protection

PITTOGRAM	PPE	METHOD OF CHOOSING THE PPE			
		CHEMICAL PROTECTION			
	The choice of gloves depends on the worker's job, the characteristics of the glove and its biocompatibility. The "grip" must always be guaranteed. The general requirements for choosing the most suitable PPE are: harmlessness, ergonomics / comfort, dexterity, transmission and absorption of water vapor and cleaning. Regarding these requirements, the reference technical standard is UNI EN 420 - Protective gloves. General requirements and test methods. Gloves	Type	Level	Time	Substances
		A	2	30 minutes	minimum 6
		B	2	30 minutes	minimum 3
		C	1	10 minutes	minimum 1
MATERIALS FOR PROTECTION FROM CHEMICAL AGENTS					
		LATEX	NEOPRENE	NITRILE	PVC

Current revision date: 23/01/2023

Current revision number: 03

Previous revision date: 28/12/2020

Previous revision number: 02

Gloves	that protect against chemicals are regulated by EN374 - Protective gloves against chemicals and microorganisms. The basic requirements for this type of gloves are: penetration and permeation. Chemical protective gloves are divided into three categories: Type A, B and C; the belonging to which depends on the number of chemicals tested, from a list of 18 substances that have reached a defined permeation time. Gloves must be checked before use. The choice of gloves based on resistance must be made following the UNI EN 16523 standard - Determination of the resistance of materials to the permeation of chemical products. Use proper technique to remove gloves avoiding skin contact with the contaminated outer surface of the glove. After use, wash and dry your hands.	Highlights	Excellent flexibility and tear resistance	Polyvalent chemical resistance: acids, aliphatic solvents. Good resistance to sunlight and ozone.	Excellent resistance to abrasion and perforation. Excellent resistance to hydrocarbon derivatives	Good resistance to acids and bases
		Precautions	It can cause allergic reactions. Avoid contact with fatty oils and hydrocarbon derivatives.	Avoid contact with fatty oils and hydrocarbon derivatives	Avoid contact with solvents containing ketones and oxidizing acids, organic nitrogen products.	Weak mechanical resistance. Avoid contact with solvents containing ketones and aromatic solvents

The Head of the Prevention and Protection Service will evaluate the choice of PPE to be used based on the duties.

**USE WATERPROOF GLOVES**

ii) other

PITTOGRAM	PPE	METHOD OF CHOOSING THE PPE				
		DANGER	Full coverage garment		Partial coverage garment	
 Work clothing	PPE for the body can be of different categories depending on their specific use. Under normal working conditions, normal work clothing offers characteristics that provide sufficient protection for workers. In activities presenting particular risks, specific "protective clothing" should be used which covers or replaces personal clothing and which is designed with specific protective characteristics. The basic requirements relating to the ergonomics and health of PPE for the body are: harmlessness of the materials, comfort and effectiveness factors, design, thermal resistance of the clothing and the characteristics of the operators. Please note that to ensure adequacy and mobility with full-coverage protective clothing, it is recommended that all operators carry out the "seven movements" test. Standard EN 13688 Protective clothing - General requirements			Waterproof	Permeable to air	Waterproof
		Gas and fumes	A	NO	NO	NO
		Jets of liquids	A	NO	P	NO
		Splashes and splashes	A	P	P	P
		Dust	A	A	P	P
		Dirt	A	A	A	A
NO: Indicates that the possibility is not compatible - A: suitable combination - P: combination that depends on external conditions						
The protective clothing against chemicals, depending on the barrier performance of the raw material used and the packaging of the garment, have different types of protection: Type 1 (gas-tight), Type 2 (non-watertight gas), Type 3 (liquid tight), Type 4 (splash tight), Type 5 (dust tight), Type 6 (limited liquid splash tight). The chemical risks are many and it is therefore necessary to choose the most appropriate garment, also considering that the materials can be both waterproof and permeable, evaluating the combination between the type of protection offered by the construction techniques and the design adopted for the realization of the garment. itself and the performance class from the raw material.						

If the Head of the Prevention and Protection Service deems it necessary, protective clothing can be worn in combination with an appropriate respiratory protection device and with boots, gloves or other means of protection.

**NO PERSONAL PROTECTIVE EQUIPMENT IS REQUIRED IN NORMAL USE**

c) RESPIRATORY PROTECTION

PITTOGRAM	PPE	METHOD OF CHOOSING THE PPE					
		DUST FILTERS					
 RPD (Respiratory protective devices)	PPE for respiratory protection are of the third category and must be provided with CE marking, the number of the Notified Body that issued the certification and must be provided only after information, training and specific training on their use. To define the type of RPD to use, pay attention to the oxygen rate present in the workplace, using the O <sub>2</sub> concentration of 17% as a limit. Carefully define the type of contaminant (Gas, steam / Dust, particles, viruses), its detection threshold and its use or not in a confined space. The UNI EN 529 standard (Respiratory protection devices - Recommendations for selection, use, care and maintenance - Guidance document) establishing the appropriate FPO value "operational protection factor" (eg use of face masks as per standard UNI EN149 - Respiratory protective devices - Filtering half mask against particles) can be a valid aid in determining the most correct PPE.	Efficiency	Dust class	RPD class and marking	Minimum total filtering efficiency	Protection	
		LOW	Filters P1	Respirators FFP1	78%	Powders/Harmful aerosol	
		AVERAGE	Filters P2	Respirators FFP2	92%	Powders/fumes/ low toxicity aerosol	
		HIGH	Filters P3	Respirators FFP3	98%	Powders/fumes/ Harmful aerosol	
		GAS FILTERS					
		Capacity	Class	Maximum concentration			
		Low	1	Gas / vapor concentrations up to 1000 ppm			
		Average	2	Gas / vapor concentrations up to 5000 ppm			
		High	3	Gas / vapor concentrations up to 10000 ppm			
		TYPE OF FILTERS					
Type	Protection			Filter color			
A	Organic gases and vapors with a boiling point > 65 ° C			BROWN			
B	Inorganic gases and vapors			GREY			
E	Acid gases			YELLOW			
K	Ammonia and derivatives			GREEN			
P	Toxic dusts, fumes, mists			WHITE			
AX (EN371)	Low boiling point organic gases and vapors <65 ° C			BROWN			
FACTORS TO CONSIDER		REASON	DUST FILTER RESPIRATORS				
Type of substance	Correct choice of filter type		Filter respirator	Nominal Protection Factor	Operational Protection Factor		
Concentrations	Need / opportunity to protect other parts of the face (eyes - face)		Facial Filter FFP1 Half mask + P1	4	4		
	Filter capacity in relation to exposure time		Facial Filter FFP2 Half mask + P2	12	10		
Visibility	Reduction of protection		Facial Filter FFP3 Half mask + P3	50	30		
Freedom of movement	Reduction of weight and discomfort		Full face + P1	5	4		
Facial anatomy	Mask adequacy		Full face + P2	20	15		
Environmental conditions			Full face + P3	1000	400		

The Head of the Prevention and Protection Service, as well as correctly defining the specific PPE for the activities, must pay attention to follow the instructions provided by the manufacturers of the various PPE.

**NO PERSONAL PROTECTIVE EQUIPMENT IS REQUIRED IN NORMAL USE**

Current revision date: 23/01/2023

Current revision number: 03

Previous revision date: 28/12/2020

Previous revision number: 02

## d) THERMAL HAZARDS

PITTOGRAM	PPE	OBSERVATIONS
 Hot/Cold	<p>The indications provided in this section define the PPE intended to protect against possible temperature variations that the mixture causes or that the mixture itself may undergo during normal working activities. PPE must protect against excesses in external temperature by maintaining body temperature, thermally insulate while maintaining permeability to water and air to ensure sweating and moisture removal, respectively, so as not to cause heat loss. In order to protect themselves from the cold, PPE must retain a degree of flexibility that allows the operator to perform the necessary actions and to assume certain positions. PPE intended for short-term interventions or likely to receive projections of hot products, must have a calorific capacity sufficient to return most of the stored heat only after the user has removed them.</p>	<p>PPE intended to protect against thermal differences must have an adequate heat flow transmission coefficient to avoid any risk of damage as required by the foreseeable conditions of use.</p> <p>The heat flow transmitted to the operator during the use of PPE must be such that its accumulation does not in any case reach the pain threshold or the one in which any harmful effect on health occurs. PPE must prevent, as far as possible, the penetration of liquids and must not cause injury caused by contact between their protective coating and the operator.</p>

The choice of this type of PPE must be made by guaranteeing thermal insulation power and mechanical and chemical resistance adequate to the foreseeable conditions of use that the Head of the Prevention and Protection Service deems necessary.

**THE MIXTURE IS NOT EXPECTED TO CAUSE OR UNDERTAKE SIGNIFICANT TEMPERATURE CHANGES DURING THE INTENDED USE.**

## 8.2.3 Environmental exposure controls

Prevent uncontrolled release into the environment.

## SECTION 9: Physical and chemical properties

## 9.1 Information on basic physical and chemical properties

The physical and chemical properties listed below are not to be considered technical specifications. The reference specifications are shown in the technical documentation.

Physical and chemical properties	Value	Notes or analytical method
a) Physical state	Solid	As defined in Annex I, section 1.0 of Reg. 1272/2008
b) Colour	Various colours	--
c) Odour	Characteristic of the fragrance	--
d) Melting point/freezing point	Not determined	--
e) Boiling point or initial boiling point and boiling range	Not determined	--
f) Flammability	NO	Applicable to gases, liquids and solids
g) Lower and upper explosion limit	Not applicable	Not applicable to solids
h) Flash point	Not applicable	Does not apply to gases, aerosols and solids
i) Auto-ignition temperature	Not applicable	Only applicable to gases and liquids
j) Decomposition temperature	Not applicable	Only applicable to self-reactive substances and mixtures, organic peroxides and other substances and mixtures which may decompose.
k) pH	Not applicable	The mixture is not soluble in water
l) Kinematic viscosity	Not applicable	Applies to liquids only
m) Solubility	Insoluble in water, partially soluble in alcohol	--
n) Partition coefficient n-octanol/water (log value)	Not applicable	It does not apply to inorganic and ionic liquids and, as a rule, does not apply to mixtures
o) Vapour pressure	Not determined	According to the REACH regulation, the study must not be conducted if the melting point is above 300°C (Annex VII, column 2 adaptation).
p) Density and/or relative density	Not applicable	only applies to liquids and solids.
q) Relative vapour density	Not applicable	only applies to gases and liquids.
r) Particle characteristics	Not relevant. Non-particulate blend	applies only to solids

## 9.2 Other information

a) Explosives:	Not applicable
b) Flammable gases:	Not applicable
c) Aerosols:	Not applicable
d) Oxidising gases:	Not applicable
e) Gases under pressure:	Not applicable
f) Flammable liquids:	Not applicable
g) Flammable solids:	Not applicable
h) Self-reactive substances and mixtures:	Not applicable
i) Pyrophoric liquids:	Not applicable
j) Pyrophoric solids:	Not applicable
k) Self-heating substances and mixtures:	Not applicable
l) Substances and mixtures, which emit flammable gases in contact with water:	Not applicable
m) Oxidising liquids:	Not applicable
n) Oxidizing solids:	Not applicable
o) Organic peroxides:	Not applicable
p) Corrosive to metals:	Not applicable
q) Desensitised explosives:	Not applicable

## 9.2.2 Other safety characteristics

a) mechanical sensitivity	: Not applicable
b) self-accelerating polymerisation temperature	: Not applicable
c) formation of explosible dust/air mixtures	: Not applicable
d) acid/alkaline reserve	: Not applicable
e) evaporation rate	: Not determined
f) miscibility	: Not miscible with water
g) conductivity	: Not applicable
h) corrosiveness	: Not applicable
i) gas group	: Not applicable
j) redox potential	: Not applicable
k) radical formation potential	: Not applicable
l) photocatalytic properties	: Not applicable

Current revision date: 23/01/2023

Current revision number: 03

Previous revision date: 28/12/2020

Previous revision number: 02

Other physical and chemical parameters:

COV (Directive 2010/75 / EC) : Not available

**SECTION 10: Stability and reactivity****10.1 Reactivity**

Stable under normal conditions of use and storage.

**10.2 Chemical stability**

Stable under normal conditions of use and storage.

**10.3 Possibility of hazardous reactions**

None known under normal conditions of use.

**10.4 Conditions to avoid**

- a) Temperature : do not subject to direct heating  
 b) Pressure : nothing to report  
 c) Light : nothing to report  
 d) Static discharge : nothing to report  
 e) Vibrations : nothing to report  
 f) Other physical stresses : no other data available

**10.5 Incompatible materials**

- a) Water : avoid contact  
 b) Air : nothing to report  
 c) Acids : avoid contact  
 d) Bases : avoid contact  
 e) Oxidising agents : avoid contact  
 f) Reducing agents : avoid contact  
 g) Chemicals : avoid contact

**10.6 Hazardous decomposition products**

Under normal conditions the preparation does not decompose. Due to thermal decomposition, fumes harmful to health are released.

**SECTION 11: Toxicological information****11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008**

Hazard classes		Information
a)	acute toxicity	: Not classified. based on available data, the classification criteria are not met.
b)	skin corrosion/irritation	: Not classified. based on available data, the classification criteria are not met.
c)	serious eye damage/irritation	: Not classified. based on available data, the classification criteria are not met.
d)	respiratory or skin sensitisation	: The presence of sensitizing substances, even in very low concentrations, can cause an allergic reaction.
e)	germ cell mutagenicity	: Not classified. based on available data, the classification criteria are not met.
f)	carcinogenicity	: Not classified. based on available data, the classification criteria are not met.
g)	reproductive toxicity	: Not classified. based on available data, the classification criteria are not met.
h)	STOT-single exposure	: Not classified. based on available data, the classification criteria are not met.
i)	STOT-repeated exposure	: Not classified. based on available data, the classification criteria are not met.
j)	aspiration hazard	: Not classified. based on available data, the classification criteria are not met.

## 11.2 Information on other hazards

### 11.2.1 Endocrine disrupting properties

The mixture does NOT contain substances identified as having endocrine-disrupting properties in accordance with the criteria established in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations equal to or greater than 0.1% in weight.

### 11.2.2 Other information

No further data available

## SECTION 12: Ecological information

**Environmental Release Categories:** ERC11a - Widespread use of articles with low release (indoor)

### 12.1 Toxicity

The product is dangerous for the environment as it is harmful to aquatic life with long lasting effects.

Use according to good working practices, avoiding to disperse the product in the environment.

## 12.2 Persistence and degradability

Data not available for the mixture.

### Specific biodegradation information for the substances contained

<b>Substance:</b>	Vanillin		
<b>CAS:</b>	121-33-5		
<b>Biodegradation in water:</b>	Easily biodegradable	<b>Tempo del test</b>	: 14d

<b>Substance:</b>	Dihydro pentamethylindanone		
<b>CAS:</b>	33704-61-9		
<b>Biodegradation in water:</b>	Not easily biodegradable	<b>Test time</b>	: 28d

<b>Substance:</b>	Ethyl trimethylcyclopentene butenol		
<b>CAS:</b>	106185-75-5		
<b>Biodegradation in water:</b>	Not easily biodegradable	<b>Test time</b>	: 29d → 5%

<b>Substance:</b>	Methylenedioxyphenyl methylpropanal (Helional)		
<b>CAS:</b>	1205-17-0		
<b>Biodegradation in water:</b>	Intrinsically biodegradable	<b>Test time</b>	: 24 giorni

<b>Substance:</b>	Tetramethyl acetyloctahydronaphthalenes		
<b>CAS:</b>	54464-57-2		
<b>Biodegradation in water:</b>	Not biodegradable	<b>Test time</b>	: 42d

<b>Substance:</b>	Acetyl Diisoamylene		
<b>CAS:</b>	--	<b>EC:</b>	939-627-8
<b>Biodegradation in water:</b>	Not biodegradable	<b>Test time</b>	: 28d

<b>Substance:</b>	4-tert-butylcyclohexyl acetate		
<b>CAS:</b>	32210-23-4		
<b>Biodegradation in water</b>	: Easily biodegradable	<b>Test time</b>	: 28d

<b>Substance:</b>	1-(1,2,3,4,6,7,8,8a-octahydro-2,3,8,8-tetramethyl-2-naphthyl) ethan-1-one (INCI: Tetramethyl Acetyloctahydronaphthalenes)		
<b>CAS:</b>	68155-67-9		
<b>Biodegradation in water:</b>	Not biodegradable	<b>Test time</b>	: 42d

<b>Substance:</b>	1-(1,2,3,5,6,7,8,8a-octahydro-2,3,8,8-tetramethyl-2-naphthyl) ethan-1-one (INCI: Tetramethyl Acetyloctahydronaphthalenes)		
<b>CAS:</b>	68155-66-8		
<b>Biodegradation in water:</b>	Not biodegradable	<b>Test time</b>	: 42d

**12.3 Bioaccumulative potential**

Data not available for the mixture.

**Bioaccumulation information specific to the substances contained**

<b>Substance:</b>	Vanillin
<b>CAS:</b>	121-33-5
<b>Partition coefficient: n-octanol/water</b>	: Log Kow (Log Pow): 1.17 a 20°C
<b>BCF</b>	: The study should not be conducted because the substance has a low bioaccumulation potential based on log Kow <= 3
<b>Substance:</b>	Dihydro pentamethylindanone
<b>CAS:</b>	33704-61-9
<b>Partition coefficient: n-octanol / water</b>	: 4.2 a 20°C
<b>BCF</b>	: 191 l/kg w/w
<b>Substance:</b>	Ethyl trimethylcyclopentene butenol
<b>CAS:</b>	106185-75-5
<b>Partition coefficient: n-octanol / water</b>	: Log Kow (Log Pow): 4.4
<b>BCF</b>	: 647.7 L/kg ww
<b>Substance:</b>	Methylenedioxyphenyl methylpropanal (Helional)
<b>CAS:</b>	1205-17-0
<b>Partition coefficient: n-octanol / water</b>	: Log Kow (Log Pow): 2.4 a 25°C
<b>BCF</b>	: Unavailable
<b>Substance:</b>	Tetramethyl acetyloctahydronaphthalenes
<b>CAS:</b>	54464-57-2
<b>Partition coefficient: n-octanol / water</b>	: Log Kow (Log Pow): 5.65 to 30°C
<b>BCF</b>	: 391 L/kg ww
<b>Substance:</b>	Acetyl Diisoamylene
<b>CAS:</b>	-- EC: 939-627-8
<b>Partition coefficient: n-octanol/water</b>	: Log Kow (Log Pow): 4.44 at 25°C
<b>BCF</b>	: 1 910 L/kg ww
<b>Substance:</b>	4-tert-butylcyclohexyl acetate
<b>CAS:</b>	32210-23-4
<b>Partition coefficient: n-octanol / water</b>	: Log Kow (Log Pow): 4.8 a 25°C
<b>BCF</b>	: 334.6 L/kg w/w
<b>Substance:</b>	1-(1,2,3,4,6,7,8,8a-octahydro-2,3,8,8-tetramethyl-2-naphthyl) ethan-1-one (INCI: Tetramethyl Acetyloctahydronaphthalenes)
<b>CAS:</b>	68155-67-9
<b>Partition coefficient: n-octanol/water</b>	: Log Kow (Log Pow): 5.65 at 30°C
<b>BCF</b>	: For aquatic organisms 391. For terrestrial organisms 5361 l/kg ww.
<b>Substance:</b>	1-(1,2,3,5,6,7,8,8a-octahydro-2,3,8,8-tetramethyl-2-naphthyl) ethan-1-one (INCI: Tetramethyl Acetyloctahydronaphthalenes)
<b>CAS:</b>	68155-66-8
<b>Partition coefficient: n-octanol/water</b>	: Log Kow (Log Pow): 5.65 at 30°C
<b>BCF</b>	: For aquatic organisms 391. For terrestrial organisms 5361 l/kg ww.

**12.4 Mobility in soil**

Data not available for the mixture.

**Mobility information in soil specific to the substances contained**

<b>Substance:</b>	Vanillin
<b>CAS:</b>	121-33-5
<b>Koc a 20 °C:</b>	4 898 [Log Koc: 3.438]
<b>Substance:</b>	Dihydro pentamethylindanone
<b>CAS:</b>	33704-61-9
<b>Koc at 20°C:</b>	200 [= LogKoc: 2.3]
<b>Substance:</b>	Ethyl trimethylcyclopentene butenol
<b>CAS:</b>	106185-75-5
<b>Koc a 20 °C:</b>	1 162.3
<b>Substance:</b>	Methylenedioxyphenyl methylpropanal (Helional)
<b>CAS:</b>	1205-17-0
<b>Koc at 20 °C:</b>	71.3 [= logKoc : 1.85]
<b>Substance:</b>	Tetramethyl acetyloctahydronaphthalenes
<b>CAS:</b>	54464-57-2
<b>Koc at 20°C:</b>	12589 [Log Koc: 4.12]
<b>Substance:</b>	Acetyl Diisoamylene
<b>CAS:</b>	-- EC: 939-627-8
<b>Koc at 20 °C:</b>	1 259 [LogKoc: 3.1]
<b>Substance:</b>	4-tert-butylcyclohexyl acetate

Previous revision number: 02

**12.5 Results of PBT and vPvB assessment**

The chemical safety report is not required for the mixture. However, based on the available data, the mixture does not contain PBT or vPvB substances in a percentage higher than 0.1 in accordance with Regulation 1907/2006, annex XIII.

**12.6 Endocrine disrupting properties**

The mixture does NOT contain substances identified as having endocrine-disrupting properties in accordance with the criteria established in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 in concentrations equal to or greater than 0.1% in weight.

**12.7 Other adverse effects**

**Classification for water pollution in Germany (AwSV, vom 18. April 2017):**

WGK 2: Dangerous for the waters.

**SECTION 13: Disposal considerations**

The substance/mixture shall not be removed through the sewerage system.

**13.1 Waste treatment methods****Container material and type:**

Glass / Plastic / Paper / Metal / Composite (identify the exact material from the symbols on the packaging).

**Methods for waste treatment of the substance or mixture:**

DANGER FEATURES (Directive 2008/98 / EC): No hazard characteristics identified  
 RECOVERY OPERATIONS (Directive 2008/98 / EC): R 13 Storage of waste pending any of the operations numbered R 1 to R 12  
 DISPOSAL OPERATIONS (Directive 2008/98 / EC): D13 - Blending or mixing prior to submission to any of the operations numbered D 1 to D 12  
 EER CODE : 20 01 39 - plastic

**Methods for handling any contaminated packaging:**

DANGER FEATURES (Directive 2008/98 / EC): No hazard characteristics identified  
 RECOVERY OPERATIONS (Directive 2008/98 / EC): R 13 Storage of waste pending any of the operations numbered R 1 to R 12  
 DISPOSAL OPERATIONS (Directive 2008/98 / EC): D13 - Blending or mixing prior to submission to any of the operations numbered D 1 to D 12  
 EER CODE : 15 01 02 plastic packaging

**Physical / chemical properties that can affect waste treatment:**

None

**Special precautions for recommended waste treatment:**

The hazard characteristics, disposal and recovery operations and the suggested EWC codes refer to the product as it is without considering any changes due to use. It is therefore recommended, before disposal, to reclassify the waste, also evaluating its origin. Any mixing of different types of non-hazardous waste and any mixture of different hazardous waste is prohibited (Article 23 of Directive 2008/98 / EC). Disposal must be entrusted to an authorized waste treatment company, in compliance with national and possibly local regulations

**SECTION 14: Transport information**

Not included in the scope of the regulations on the transport of dangerous goods: by road (ADR); by rail (RID); by air (ICAO / IATA); by sea (IMDG).

	ADR	IMDG	IATA
14.1 UN number or ID number		Not applicable	
14.2 UN proper shipping name		Not applicable	
14.3 Transport hazard class(es)		Not applicable	
14.4 Packing group		Not applicable	
14.5 Environmental hazards		Not applicable	
14.6 Special precautions for user		Not applicable	
14.7 Maritime transport in bulk according to IMO instruments		Not applicable	

**SECTION 15: Regulatory information****15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture**

**Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006** concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC.

**REGULATION (EC) No 1272/2008 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 16 December 2008** on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006.

**Directive 2008/98/EC of the European Parliament and of the Council of 19 November 2008** on waste and repealing certain Directives.

**Regulation (EU) No 528/2012 of the European Parliament and of the Council of 22 May 2012** concerning the making available on the market and use of biocidal products.

**Commission Delegated Regulation (EU) 2017/2100 of 4 September 2017** setting out scientific criteria for the determination of endocrine-disrupting properties pursuant to Regulation (EU) No 528/2012 of the European Parliament and Council.

**Commission Regulation (EU) No 1357/2014 of 18 December 2014** replacing Annex III to Directive 2008/98/EC of the European Parliament and of the Council on waste and repealing certain Directives

**COMMISSION DECISION of 18 December 2014** amending Decision 2000/532/EC on the list of waste pursuant to Directive 2008/98/EC of the European Parliament and of the Council

**REGULATION (EC) No 648/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 31 March 2004** on detergents

**Directive 2010/75/EU** of the European Parliament and of the Council of 24 November 2010 on industrial emissions (integrated pollution prevention and control)

**Directive 2004/42/CE** of the European Parliament and of the Council of 21 April 2004 on the limitation of emissions of volatile organic compounds due to the use of organic solvents in certain paints and varnishes and vehicle refinishing products and amending Directive 1999/13/EC

**DIRECTIVE 2012/18/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 4 July 2012** on the control of major-accident hazards involving dangerous substances, amending and subsequently repealing Council Directive 96/82/EC

**Product:** CESARE VANILLA

**Category SEVESO:** --

**Regulation (EU) 2019/1148** of the European Parliament and of the Council of 20 June 2019 on the marketing and use of explosives precursors, amending Regulation (EC) No 1907/2006 and repealing Regulation (EU) No 98/2013

The mixture does not contain an explosive precursor.

**15.2 Chemical safety assessment**

Chemical safety assessment for the mixture not foreseen. This safety data sheet contains one or more Exposure Scenarios in an integrated form. The content, where relevant, has been included in sections 1.2, 8, 9, 12, 15 and 16 of the same safety data sheet

**SECTION 16: Other information****16.1 Indication of any points of the SDS that have been revised**

This sheet completely replaces all previous versions.

Current revision date: 23/01/2023

Current revision number: 03

Previous revision date: 28/12/2020

Previous revision number: 02

## 16.2 Key abbreviations and acronyms used in this SDS

APVR	Respiratory protective equipment
ATE	Acute Toxicity Estimates
BCF	Bioconcentration Factor
CAS	Chemical abstract service
CE	European Community
CLP	Classification, Labelling and Packaging
COV	Volatile Organic Compounds
DNEL	Derived No Effect Level
DPI	Dispositivi di Protezione Individuale
EC	European Community
EC50	Half maximal effective concentration
ECHA	European Chemicals Agency
EER	European Waste List
EmS	Emergency Schedules
EN	European normalization
ERC	Environmental release categories
EUH	Supplemental hazard information
EuPCS	European Product Categorisation System
FPN	Protection factor Nominal
FFP	Filtering Facepiece

FPO	Operational protection factor
GHS	Globally Harmonized System
HP	Hazardous Properties
IMO	International Maritime Organization
ISO	International Standard Organization
LC50	Median lethal concentration
LD50	Median lethal dose
N.A.S.	Not otherwise specified
NOEC	No observed effect concentration
ONU	United Nations Organization
PBT	Persistent, Bioaccumulative and Toxic Substances
vPvB	Very Persistent and very Bioaccumulative substances
ppm	Parts per million
PROC	Category of processes
REACH	Regulation on Registration, Evaluation, Authorisation and Restriction of Chemicals
STOT	Specific target organ toxicity
STP	Sewage treatment plant
UE	European Union
UFI	Unique Identifier of Formula
UNI	Italian Standard Organization.

## 16.3 Full text of the Classification Information set out in Section 3

## Description of the hazard class and category codes set out in section 3

Eye Irrit. 2 - Serious eye damage/eye irritation, Hazard Category 2  
 Skin Irrit. 2 - Skin corrosion/irritation, Hazard Category 2  
 Skin. Sens. 1B - Sensitisation — Skin, hazard category 1B  
 Aquatic Chronic 2 - Hazardous to the aquatic environment — Chronic Hazard, Category 2  
 Skin. Sens. 1 - Sensitisation — Skin, hazard category 1  
 Aquatic Chronic 1 - Hazardous to the aquatic environment — Chronic Hazard, Category 1  
 Skin. Sens. 1A - Sensitisation — Skin, hazard category 1A

## Description of the hazard statements set out in section 3

H319 - Causes serious eye irritation  
 H315 - Causes skin irritation  
 H317 - May cause an allergic skin reaction.  
 H411 - Toxic to aquatic life with long lasting effects.  
 H317 - May cause an allergic skin reaction.  
 H410 - Very toxic to aquatic life with long lasting effects  
 H317 - May cause an allergic skin reaction.

## Indicazioni di pericolo supplementari esposte alla sezione 3

None

**M-Factor** Means a multiplying factor. It is applied to the concentration of a substance classified as hazardous to the aquatic environment acute category 1 or chronic category 1.

## 16.4 Bibliographical references and main data sources

ECHA	European Chemicals Agency	OSHA	European Agency for Safety and Health at Work	IARC	International Agency for Research on Cancer
TOXNET	Toxicology Data Network	WHO	World Health Organization	ACGIH	American Conference of Governmental Industrial Hygienists
CheLIST	Chemical Lists Information System	ICSCs	International Chemical Safety Cards	ILO	International Labour Organization
IPCS	International Programme on Chemical Safety (Cards)	NIOSH	Registry of toxic effects of chemical substances (1983)	IFA	Institut für Arbeitsschutz der Deutschen Gesetzlichen Unfallversicherung

Safety Data Sheet compliant with regulation (EU) n. 2020/878 of 18 June 2020

This document has been drawn up by a competent SDS technician who has received adequate training and is certified according to the reference practice UNI / PdR 60: 2019. Certificate issued by INTERTEK ITALIA S.p.A. Registration number: EPTAS2018-00225 exp. 25-Nov-2023

The information in this safety data sheet has been obtained from the best available or known to us on the market at the revision date indicated. Neither the company holding this sheet nor its subsidiaries will be able to accept complaints arising from improper use of the information indicated here or from improper use in applying the product. Pay particular attention to the use of preparations because improper use can increase their danger.
